

Village of Lake Isabella

Article VI – General Nuisance Regulations

Chapter 650 – Wireless Facilities in the Right-of-Way

Originally adopted; August 20, 2019, by Ordinance 2019-06

Chapter 650.01	Definitions
Chapter 650.03	Permit Required
Chapter 650.05	Permitting Process
Chapter 650.07	Determination
Chapter 650.09	METRO Act Permit
Chapter 650.11	Design Parameters
Chapter 650.13	Modification of Design Parameters
Chapter 650.15	Repair of ROW
Chapter 650.17	Discontinuance of Use
Chapter 650.19	Revocation of Permit
Chapter 650.21	Compliance with Applicable Law
Chapter 650.23	Fees

650.01 DEFINITIONS

For purposes of this section, the following words, terms, and phrases shall be defined as follows:

Act shall mean Public Act 365 of 2018, as amended, the Small Wireless Communications Facilities Deployment Act

Co-locate means to install, mount, maintain, modify, operate, or replace wireless facilities on or adjacent to a wireless support structure or utility pole. "Co-location" has a corresponding meaning. Co-locate does not include make-ready work or the installation of a new utility pole or new wireless support structure.

Public right-of-way or *ROW* means the area on, below, or above a public roadway, highway, street, alley, bridge, sidewalk, or utility easement dedicated for compatible uses. Public right-of-way does not include any of the following:

- (i) A private right-of-way.
- (ii) A limited-access highway.
- (iii) Land owned or controlled by a railroad as defined in section 109 of the railroad code of 1993, 1993 PA 354, MCL 462.109.

(iv) Railroad infrastructure.

Small cell wireless facility means a wireless facility that meets both of the following requirements:

(i) Each antenna is located inside an enclosure of not more than 6 cubic feet in volume or, in the case of an antenna that has exposed elements, the antenna and all of its exposed elements would fit within an imaginary enclosure of not more than 6 cubic feet.

(ii) All other wireless equipment associated with the facility is cumulatively not more than 25 cubic feet in volume. The following types of associated ancillary equipment are not included in the calculation of equipment volume: electric meters, concealment elements, telecommunications demarcation boxes, grounding equipment, power transfer switches, cut-off switches, and vertical cable runs for the connection of power and other services.

Utility pole means a pole or similar structure that is or may be used in whole or in part for cable or wireline communications service, electric distribution, lighting, traffic control, signage, or a similar function, or a pole or similar structure that meets the height requirements in section 13(5) and is designed to support small cell wireless facilities. Utility pole does not include a sign pole less than 15 feet in height above ground.

Wireless facility means equipment at a fixed location that enables the provision of wireless services between user equipment and a communications network, including, but not limited to, radio transceivers, antennas, coaxial or fiber-optic cable, regular and backup power supplies, and comparable equipment, regardless of technological configuration. Wireless facility includes a small cell wireless facility. Wireless facility does not include any of the following:

(i) The structure or improvements on, under, or within which the equipment is co-located.

(ii) A wireline backhaul facility.

(iii) Coaxial or fiber-optic cable between utility poles or wireless support structures or that otherwise is not immediately adjacent to or directly associated with a particular antenna.

Wireless infrastructure provider means any person, including a person authorized to provide telecommunications services in this state but not including a wireless services provider, that builds or installs wireless communication transmission equipment, wireless facilities, or wireless support structures and who, when filing an application with the Village under this section, provides written authorization to perform the work on behalf of a wireless services provider.

Wireless provider means a wireless infrastructure provider or a wireless services provider. Wireless provider does not include an investor-owned utility whose rates are regulated by the MPSC.

Wireless services means any services, provided using permitted or unpermitted spectrum, including the use of Wi-Fi, whether at a fixed location or mobile.

Wireless services provider means a person that provides wireless services.

Wireless support structure means a freestanding structure designed to support or capable of supporting small cell wireless facilities. Wireless support structure does not include a utility pole.

All other terms and phrases used herein shall be defined consistent with the Act.

650.03 PERMIT REQUIRED

A wireless provider may not co-locate a small cell wireless facility or install, modify, or replace a utility pole or wireless support structure on which a small cell wireless facility will be co-located within the public right-of-way without first applying for and receiving a small cell wireless permit from the Village of Lake Isabella in a form and subject to such terms and conditions as are acceptable to the Village.

650.05 PERMITTING PROCESS

The processing of an application for a permit under this section is subject to all of the following:

- (1) An application in such form as prepared by the Village of Lake Isabella shall be completed and submitted as set forth in this section.
- (2) The Village Clerk may require an applicant to provide information and documentation to enable the Village Council to make a compliance

determination with regard to the criteria in this section involving, without limitation, subsection (d)(3). The Village Clerk may also require a certificate of compliance with FCC rules related to radio frequency emissions from a small cell wireless facility.

- (3) If the proposed activity will occur within a shared ROW or a ROW that overlaps another ROW, a wireless provider shall provide, to each affected jurisdiction, to which an application for the activity is not submitted, notification of the wireless provider's intent to locate a small cell wireless facility within the ROW. The Village Clerk may require proof of other necessary permits, permit applications, or easements to ensure all necessary permissions for the proposed activity are obtained.
- (4) The Village Clerk may require an applicant to attest that the small cell wireless facilities will be operational for use by a wireless services provider within 1 year after the permit issuance date, unless the Village Council and the applicant agree to extend this period or delay is caused by lack of commercial power or communications transport facilities to the site.
- (5) An applicant may, at the applicant's discretion, file a consolidated application and receive a single permit for the co-location of up to 20 small cell wireless facilities within the Village of Lake Isabella. The small cell wireless facilities within a consolidated application must consist of substantially similar equipment and be placed on similar types of utility poles or wireless support structures. The Village Council may approve a permit for 1 or more small cell wireless facilities included in a consolidated application and deny a permit for the remaining small cell facilities.
- (6) The application for a permit under this section shall be accompanied by an application fee as set by resolution of the Village Council from time to time.
- (7) The permit application shall be accompanied by a map(s) for any proposed small cell wireless facilities which shall be legible, to scale, labeled with streets, and contain sufficient detail to precisely identify the proposed small cell wireless facilities' locations and surroundings. Where applicable, the required map(s) shall include and identify any requested pole height(s), all attachments and detailed drawings of any attachment.
- (8) The permittee shall field-stake all proposed locations for small cell wireless facilities which shall be subject to the advance approval of the Village of Lake Isabella, Isabella County Road Commission and/or the Michigan Department of

Transportation as applicable. All approved small cell wireless facilities' locations shall be on a per pole/equipment/other basis.

- (9) Once precise locations have been approved, the permittee shall provide latitude and longitude coordinates for the small cell wireless facilities' locations to the Village's engineering consultant as well as detailed as-built drawings within 90 days of the completion of installation.
- (10) The permittee shall be responsible for obtaining such other permits and approvals as otherwise required by law.

650.07 DETERMINATION

- (1) Within 25 days after receiving an application, the Village Clerk shall notify the applicant in writing whether the application is complete. If the application is incomplete, the notice shall clearly and specifically identify all missing documents or information.
- (2) Upon receipt of a complete application, the Village Council shall approve or deny the application and notify the applicant in writing within the following period of time after the completed application is received:
 - (A) For an application for the co-location of small cell wireless facilities on a utility pole, 60 days, subject to the following adjustments:
 - (i) Add 15 days if an application from another wireless provider was received within 1 week of the application in question.
 - (ii) Add 15 days if, before the otherwise applicable 60-day or 75-day time period elapses, the Village Clerk notifies the applicant in writing that an extension is needed and the reasons for the extension.
 - (B) For an application for a new or replacement utility pole that meets the height requirements of section 13(5)(a) of the Act and associated small cell facility, 90 days, subject to the following adjustments:
 - (i) Add 15 days if an application from another wireless provider was received within 1 week of the application in question.
 - (ii) Add 15 days if, before the otherwise applicable 90-day or 105-day time period elapses, the Village Clerk notifies the applicant in writing that an extension is needed and the reasons for the extension.

If the Village Clerk fails to comply with this subsection, an application otherwise complete is considered to be approved subject to the condition that the applicant provide the Village not less than 7 days' advance written notice that the applicant will be proceeding with the work pursuant to this automatic approval and the applicant shall be responsible for complying with all provisions of this section and the Act.

The Village Council and an applicant may extend a time period under this subsection by mutual agreement.

- (3) The Village Council may deny a completed application for a proposed co-location of a small cell wireless facility or installation, modification, or replacement of a utility pole that meets the height requirements in section 13(5)(a) of the Act if the proposed activity would do any of the following:
- (A) Materially interfere with the safe operation of traffic control equipment.
 - (B) Materially interfere with sight lines or clear zones for transportation or pedestrians.
 - (C) Materially interfere with compliance with the Americans with Disabilities Act of 1990, Public Law 101-336, or similar federal, state, or local standards regarding pedestrian access or movement.
 - (D) Materially interfere with maintenance or full unobstructed use of the Lake Isabella Airport.
 - (E) With respect to drainage infrastructure under the jurisdiction of the Village, either of the following:
 - (i) Materially interfere with maintenance or full unobstructed use of the drainage infrastructure as it was originally designed.
 - (ii) Not be located a reasonable distance from the drainage infrastructure to ensure maintenance under the drain code of 1956, 1956 PA 40, MCL 280.1 to 280.630, and access to the drainage infrastructure.
 - (F) Fail to comply with reasonable, nondiscriminatory, written spacing requirements of general applicability adopted by the Village of Lake Isabella by ordinance, or otherwise, that apply to the location of ground-mounted equipment and new utility poles and that does not prevent a wireless provider from serving any location. The spacing requirement for all ground-mounted equipment and new utility poles shall be not less than 500 linear feet from ground-mounted equipment and utility poles.

- (G) Fail to comply with applicable codes.
 - (H) Fail to comply with any provision of this section.
 - (I) Fail to meet reasonable, objective, written stealth or concealment criteria for small cell wireless facilities applicable in a historic district or other designated area, as specified in an ordinance or otherwise and non-discriminatorily applied to all other occupants of the ROW, including electric utilities, incumbent or competitive local exchange carriers, fiber providers, and cable television operators.
- (4) Within 1 year after a permit is granted, a wireless provider shall complete co-location of a small cell wireless facility that is to be operational for use by a wireless services provider, unless the Village Council and the applicant agree to extend this period or the delay is caused by the lack of commercial power or communications facilities at the site. If the wireless provider fails to complete the co-location within the applicable time, the permit is void, and the wireless provider may reapply for a permit.
 - (5) Approval of an application authorizes the wireless provider to do both of the following:
 - (A) Undertake the installation or co-location.
 - (B) Subject to relocation requirements that apply to similarly situated users of the ROW and the applicant's right to terminate at any time, maintain the small cell wireless facilities and any associated utility poles or wireless support structures covered by the permit for so long as the site is in use and in compliance with the initial permit under this act.
 - (6) The Village may propose an alternate location within the ROW or on property or structures owned or controlled by the Village within 75 feet of the proposed location to either place the new utility pole or co-locate on an existing structure. The applicant shall use the alternate location if, as determined by the applicant, the applicant has the right to do so on reasonable terms and conditions and the alternate location does not impose unreasonable technical limits or significant additional costs. The Village may request written confirmation of any decision rendered by the applicant under this subsection and the specific basis for the same.
 - (7) Nothing herein shall prohibit the Village of Lake Isabella from requiring a separate ROW access permit for work that will unreasonably affect traffic patterns or obstruct vehicular or pedestrian traffic in the ROW.

- (8) As a condition of the issuance of a permit, the applicant shall obtain and maintain a bond, in the amount of \$1,000.00 per small cell wireless facility, in a form reasonably satisfactory to the Village, for the small cell wireless facilities as applicable to similarly situated users of the ROW for one or more of the following purposes:
- (A) To provide for the removal of abandoned or improperly maintained small cell wireless facilities, including those that an authority determines should be removed to protect public health, safety, or welfare.
 - (B) To repair the ROW as provided under the Act.
 - (C) To recoup rates or fees that have not been paid by a wireless provider in more than 12 months, if the wireless provider has received 60-day advance notice from the authority of the noncompliance.
- (9) It is a condition of any permit issued under this section that:
- (A) A wireless provider, with respect to a small cell wireless facility, a wireless support structure, or a utility pole, shall defend, indemnify, and hold harmless the Village of Lake Isabella and its officers, agents, and employees against any claims, demands, damages, lawsuits, judgments, costs, liens, losses, expenses, and attorney fees resulting from the installation, construction, repair, replacement, operation, or maintenance of any wireless facilities, wireless support structures, or utility poles to the extent caused by the applicant, its contractors, its subcontractors, and the officers, employees, or agents of any of these. A wireless provider has no obligation to defend, indemnify, or hold harmless the Village of Lake Isabella, or the officers, agents, or employees of the Village or governing body against any liabilities or losses due to or caused by the sole negligence of the Village of Lake Isabella.
 - (B) A wireless provider, with respect to a small cell wireless facility, a wireless support structure, or a utility pole, shall obtain insurance, in an amount and of a type reasonably satisfactory to the Village Council, naming the Village of Lake Isabella and its officers, agents, and employees as additional insureds against any claims, demands, damages, lawsuits, judgments, costs, liens, losses, expenses, and attorney fees. A wireless provider may meet all or a portion of the Village's insurance coverage and limit requirements by self-insurance. To the extent it self-insures, a wireless provider is not required to name additional insureds under this subsection. To the extent a wireless provider elects to self-insure, the wireless provider shall provide to

the Village Clerk evidence demonstrating, to the Village's satisfaction, the wireless provider's financial ability to meet the Village's insurance coverage and limit requirements.

It is the policy of the Village of Lake Isabella to encourage the co-location of small cell wireless facilities first, outside of public rights-of-way and, secondarily, within the public rights-of-way. The co-location of uses shall be a condition of approval of any permit granted for a new wireless support structure or utility pole in the public right-of-way; provided, however, that the co-location requirement may be waived if the pole or support structure is disguised or stealthed so as to blend with the immediate environment (e.g., streetlights, power poles, etc.).

650.09 METRO ACT PERMIT

No person shall install or operate "telecommunications facilities," as defined in the Metropolitan Extension Telecommunications Rights-Of-Way Oversight Act, Act No. 48 of the Public Acts of 2002, as amended (the "act") without first obtaining a permit in accordance with that act from the Street Administrator, including any part of a small cell wireless facility, utility pole, or wireless support structure constituting telecommunication facilities.

650.11 DESIGN PARAMETERS

The following minimal design parameters shall apply to small cell wireless facilities, utility poles and wireless support structures in the Village's public rights-of-way:

- (1) A wireless provider may, as a permitted use not subject to zoning review or approval, but still subject to approval by the Street Administrator under this section, co-locate small cell wireless facilities and construct, maintain, modify, operate, or replace utility poles in, along, across, upon, and under the ROW consistent with the following:
 - (A) A utility pole in the ROW installed or modified on or after the effective date of the Act shall not exceed 40 feet above ground level, unless a taller height is agreed to by the Village Council consistent with all applicable laws.
 - (B) A small cell wireless facility in the ROW installed or modified after the effective date of the Act shall not extend more than 5 feet above a utility pole

or wireless support structure on which the small cell wireless facility is co-located.

- (2) Such structures and facilities shall be constructed and maintained so as not to obstruct or hinder the usual travel or public safety on the ROW or obstruct the legal use of the Village's ROW or uses of the ROW by other utilities and communications service providers.
- (3) A wireless provider may co-locate a small cell wireless facility or install, construct, maintain, modify, operate, or replace a utility pole that exceeds the height limits under subsection (1), or a wireless support structure, in, along, across, upon, and under the ROW only upon issuance of a permit in accordance with this Section and upon receiving zoning approvals required by the Village of Lake Isabella.
- (4) The following design and concealment measures shall apply to the co-location of any small cell wireless facility or utility pole in an historic, residential, or downtown district:
 - (A) Equipment on a supporting structure may not exceed an aggregate width of four feet (centered on pole) and shall be secured a minimum of ten feet from the ground surface or 18 feet where equipment may overhang the back of curb line. Ground level equipment or shelters are not permitted.
 - (B) Small cell wireless facilities shall be located no closer than 18 inches from an existing sidewalk/face of curb or 18 inches from a proposed future sidewalk/face of curb location.
 - (C) Small cell wireless facilities shall be located no closer than ten feet from any driveway.
 - (D) Small cell wireless facilities shall be located in line with a side lot line and not in front of a residence.
 - (E) Unless otherwise required by the Federal Communications Commission (FCC), the Federal Aviation Administration (FAA), or applicable codes poles shall either maintain a galvanized silver, gray or concrete finish or, subject to any applicable standards of the FAA, FCC or such codes, be painted a neutral color so as to reduce visual obtrusiveness.
 - (F) At all pole sites related equipment shall use materials, colors, textures, screening, and landscaping that will blend the facilities to the natural setting and environment to the extent reasonably practical.

- (G) All poles shall be of monopole design and construction unless the Village Council approves an alternate design. Disguising or stealthing poles is encouraged. Any such requirements shall not have the effect of prohibiting any wireless provider's technology.
- (5) A wireless provider shall comply with any Village requirements that prohibit communications service providers from installing structures on or above ground in the ROW in an area designated solely for underground or buried cable and utility facilities if each of the following apply:
 - (A) The Village has required all cable and utility facilities, other than streetlight poles, along with any attachments, or poles used for street lights, traffic signals, or other attachments necessary for public safety, to be placed underground by a date that is not less than 90 days before the submission of the wireless provider's application.
 - (B) The Village does not prohibit the replacement of existing poles by a wireless provider in the designated area.

650.13 MODIFICATION OF DESIGN PARAMETERS

Upon the written request of an applicant for a permit, the Lake Isabella Village Council may modify or waive the design parameters of subsection (f)(4) and (f)(5) in its discretion following a hearing and based on its review of factors affecting the public health, safety and welfare including, but not limited to, the following: the presence of existing poles or other structures or equipment in the immediate vicinity; the ability to reasonably comply with the design parameters set forth in subsection (f)(4) and (f)(5); the visual and aesthetic impact of the proposed pole, antenna or facilities on the adjacent area; the existing and planned character of the adjacent area; public comment; the scale and scope of the poles, antennas or facilities relative to the existing character of the area; whether granting the modification will adversely impact public safety; and the recommendations of Village engineering consultant. Following its review, the Lake Isabella Village Council may grant, deny or grant with conditions a request to modify or waive the design parameters and shall provide its decision and the basis for the same to the applicant in writing. All applications for a waiver or modification of the design parameters as set forth herein shall be addressed in a uniform and nondiscriminatory manner. The applicant shall be responsible to pay all costs of the Village associated with the request to modify or waive the design parameters.

650.15 REPAIR OF ROW

As a condition to the issuance of a permit under this section, a wireless provider is required to repair all damage to the ROW directly caused by the activities of the wireless provider while occupying, constructing, installing, mounting, maintaining, modifying, operating, or replacing small cell wireless facilities, utility poles, or wireless support structures in the ROW and to return the ROW to its functional equivalent before the damage. If the wireless provider fails to make the repairs required by the Street Administrator within 60 days after written notice, the Village Council may authorize to make such repairs and charge the wireless provider the reasonable, documented cost of the repairs

650.17 DISCONTINUANCE OF USE

Before discontinuing its use of a small cell wireless facility, utility pole, or wireless support structure, a wireless provider shall notify the Village Clerk in writing. The notice shall specify when and how the wireless provider intends to remove the small cell wireless facility, utility pole, or wireless support structure. The Village Council may impose reasonable and nondiscriminatory requirements and specifications for the wireless provider to return the property to its pre-installation condition. If the wireless provider does not complete the removal within 45 days after the discontinuance of use, the Street Administrator may complete the removal and assess the costs of removal against the wireless provider. A permit under this section for a small cell wireless facility expires upon removal of the small cell wireless facility.

650.19 REVOCATION OF PERMIT

The Village Council may revoke a permit, upon 30 days' notice and an opportunity to cure, if the permitted small cell wireless facilities and any associated utility pole fail to meet the requirements of subsection (d)(3).

650.21 COMPLIANCE WITH APPLICABLE LAW

The permittee shall be responsible to comply with all applicable legal requirements and to obtain any permits or approvals otherwise required by law relative to the installation or operation of small cell wireless facilities in the Village's public rights-

of-way (e.g., electrical permits). The Village, in reviewing and authorizing a permit under the act and/or a permit referred to in this section, and the permittee, in the establishment and operation of any small cell wireless facilities, shall comply with all applicable federal and state laws.

650.23 FEES

Fees for the permits as authorized under the Act shall be as provided for in the Act or those documents and as periodically authorized by resolution of the Lake Isabella Village Council; provided, however, that for installations of utility poles designed to support small cell wireless facilities or co-locations of small cell wireless facilities installed and operational in the ROW before the effective date of the Act, the fees, rates, and terms of an agreement or ordinance for use of the ROW remain in effect subject to the termination provisions contained in the agreement or ordinance.
