Village of Lake Isabella Shed Regulations

- Chapter 1204 of the zoning code defines a “shed” as: *An accessory structure with a footprint equal to, or less than, 240 square feet that is used for storage.* Meaning, if your storage building is greater than 240 square feet it is not considered a “shed,” and this permit application is not applicable to your project.
- Sheds are required to be placed on a parcel with a dwelling. If your parcel is comprised of multiple lots, it may be necessary to permanently combine the lots into a single parcel as a condition of this approval.
- Sheds which are built of a non-permanent construction, such having skids placed on a slab or over gravel, a maximum footprint of 240 square feet (240 ft²) is permitted.
- Sheds which are built of a more permanent style of construction, including pole construction, shall be limited to a maximum footprint of 200 square feet.
- Sheds shall have side walls no taller than eight feet (8’). The height shall be limited to a single story above the finished grade.
- Section 1220.09-1C regulates the placement of sheds by the type of parcel as follows:

Parcel Type	Front/Street Yard Setback	Max Distance at Closest Point from Primary Structure in a Waterfront Yard	Secondary Street Frontage	Ordinary High Water Mark Setback	Side Yard Setback	Rear Yard Setback
Non-Waterfront	Not Permitted	Not Applicable	20’	Not Applicable	8’	2’
Waterfront	35’	20’	20’	50’	8’	8’*
T-Lot	35’	20’	NA	35’	2’	2’*

* This setback only applies if the yard abutting the water would not normally be considered the rear yard.

- When a shed is placed in the street-side yard of a waterfront parcel, including T-Lots, the shed shall be placed in a manner where it connects to the driveway.
- For all new sheds placed on waterfront parcels, including T-Lots, the design and landscaping requirements of section 1220.13 shall be required to be met and maintained.
- Section 1220.15 limits residential parcels to one garage (either attached or detached) and one shed. If the parcel is located in the LR-2 district and has an existing home but no garage, a second shed may be substituted for the allowed garage.
- Unpainted, uncolored or unfinished material is prohibited for the exterior of a shed, unless such material is designed and marketed for exterior finish work and is weather resistant in its unfinished state.
- Sheds are required to have an exterior of wood, resin, or vinyl. Metal sheds are not permitted.

These regulations are valid as of the date of the permit and may change at a later date in time, if you are considering additional changes after the date of this permit please contact the Village Hall at (989) 644.8654. This permit is granted under the assumption that the information provided by the applicant is true and accurate. If this is found to be faulty at a later date in time the approval of this permit may be voided by the Village of Lake Isabella.
